

Exhibit B - Excerpt of Pramudji Deposition (3-23-2016)

1 Q. Would you agree that you are not an expert in
2 polymer chemistry?

3 A. No, I would not agree with that. I mean, I
4 have dealt with polymers all these years as a surgeon
5 and I was a chemical engineering undergrad and studied
6 polymer science there, so I feel comfortable with
7 polymers and I understand how Gynemesh works in
8 patients in over 2000 patients.

9 Q. So you hold yourself out as an expert in
10 polymer chemistry. Is that right?

11 A. Yes, as far as it -- as far as it relates to
12 my practice, I certainly do.

13 Q. Have you ever done any chemical testing with
14 the Prolene Soft mesh or the mesh in the Prolift or
15 the Prosima to see if it degrades?

16 A. No, I haven't done that.

17 Q. Have you ever done a microscopic analysis of
18 the Prolene Soft mesh or the mesh that's in the --
19 which is the mesh that's in the Prolift or in Prosima
20 to determine if it degrades?

21 A. No, I haven't.

22 Q. Do you -- strike that.

23 In support of your opinion regarding mesh
24 degradation you state that the reoperation rates for
